

Scene Rough Plan:

Sequence 1 (Forest):

(Scene 1) Establishing overhead shot of the forest. (Scene 2) The view zooms in on rustling grass.

(Scene 3) Lamina bursts out of the grass, and scratches her ear. A butterfly catches her attention as it flies in front of and away from Lamina. (Scene 4) Lamina follows it, but notices a berry on the ground. (Scene 4) She moves to the berry and picks it up, (Scene 5) activating a trap that causes a cage to snap shut around her. (Scene 6) Lamina looks up with the camera at a high angle. (Scene 7) The camera then turns to The Scientist at a low angle. (Scene 8) The Scientist's hand grabs at the camera, making the screen go fully black.

Sequence 2 (Dissection Room):

(Scene 1) The Scientist enters the laboratory from the main door carrying Lamina's cage, the camera views from inside looking at the door opening. (Scene 2) Camera focuses on Lamina inside the cage until she notices something outside. (Scene 3) The camera turns to the dissection table, (Scene 4) and provides a full shot of the dissected rat. (Scene 5) Turn back to Lamina with a horrified expression as the Scientist walks away from the camera into darkness.

Sequence 3 (Serum Room):

(Scene 1) Lamina's cage is put onto a table, The Scientist grabs her and pulls her out. (Scene 2) Turn the camera facing the Scientist holding Lamina (the camera should be at a low angle with The Scientist towering over Lamina). (Scene 3) Focus on the Scientist's hand pulling out the syringe from a pocket. (Scene 4) The camera turns around to have the hand holding the Syringe in the foreground while Lamina is being held in the midground. The Syringe plunges toward Lamina with

the camera following the Syringe. (Scene 5) The scene should go dark, with an x-ray of Lamina's skeleton filling with the Syringe's liquid as she squeals in pain, the screen completely turns black.

Sequence 4 (Cage Room):

(Scene 1) Lamina slowly wakes up, with the camera zooming out to reveal that she's in a new cage surrounded by other rats in cages (start close up, then become a wide establishing shot). (Scene 2) (Close up) She looks out of the front hatch of her cage and tries to gnaw at the cage bars. (Scene 3) (Close up) When that doesn't work, she tries slamming herself against the cage, but she bounces off and collapses on the cage floor. (Scene 4) (close up) She lifts her head and drops it in defeat. (Scene 5) The screen flashes back to the scene with the dissected rat. (Scene 6) (Close up of her eye) Lamina wakes up with bloodshot eyes, (Scene 7) and approaches the cage door. (Scene 8) With great effort, Lamina pulls open the cage bars. While she is pulling the cage, the screen turns dark with her x-ray visible and the serum liquid is glowing inside her. (Scene 9) She then drops down onto the floor and stands up; (Scene 10) here, the camera switches to a side scrolling gameplay viewport.
